

More organic!

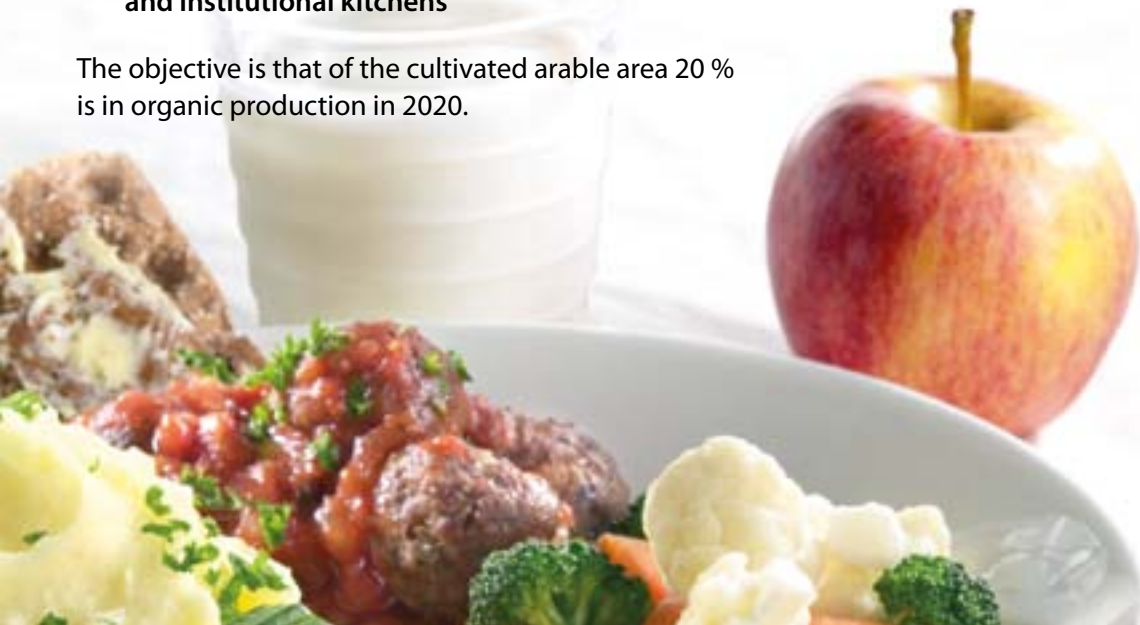

Government programme for the Finnish organic product sector and objectives to 2020

Government development programme for the organic product sector and objectives to 2020

- growing volumes of organic production
- greater diversity in the supply of organic foods
- improving the access to organic food through trade and institutional kitchens

The objective is that of the cultivated arable area 20 % is in organic production in 2020.

Finnish organic actors

Finnish Organic Research Institute promotes organic food production and consumption throughout the Finnish food chain by research, science communication, education, and development projects.

The Finnish Organic Association **Luomuliitto** strengthens the organic branch together with its members; farmers, small-scale entrepreneurs and consumers.

<http://luomuliitto.fi>

The Finnish Organic Food Association **Pro Luomu** promotes the development and growth of organics in Finland. The association has about 50 member organisations, which cover different actors of the field.

<http://proluomu.fi>

Steps to Organic is a voluntary program for professional kitchens in Finland. The goal of the program is to coach especially the public sector industrial kitchens into a more sustainable development by increasing the use of organic ingredients in their daily activities.
