

Forum of Solutions

During the seminar a Forum of Solutions is organized where companies and project actors are welcome to present their experiments and experiences on nutrient recycling.

If you are interested in participating in the Forum of Solutions, please contact Noora Mantere by the **11th of April**: forename.surname@gmail.com, [+358 40 737 1404](tel:+358407371404)

The venue of the forum is equipped with two kinds of tables: square tables (45 x 140 cm) and smaller, higher tables. Let us know what kind of a table you would need. We hope that you bring your own roll-up with you since there is no wall you could attach material to.

There is also a separate table reserved for brochures and other material to be shared to the seminar audience by those organizations who do not wish to reserve their own stand at the forum.

In case there are more applicants than there is space for, the organizers of the event withhold the right to select participants to the forum.
